Telephone Orders

Open between 6am - 5pm (PST) Mon-Fri. Also online at: GoodVibrationsRacing.com. Most orders are processed and shipped within 24 hours. UPS, DHL & USPS are the methods of shipping unless otherwise specified. Domestic UPS Ground is approximately 1-4 business days, depending on your location. Faster service is available (See chart on left page).

Payment Policy & Returns

Orders can be Paid by Amer Express, Mastercard, Visa, Discover credit/debit cards or Paypal. No reasonable return will be refused though cancelled orders and returns can be subject up to a 20% restock fee. A copy of the original should accompany all returns within 30 days of the original purchase date.

A RMA number is required for returns.

Freight & Shipping

All shipments are shipped freight prepaid unless other arrangements are made. All shipments are fully insured. If your shipment is damaged, save all packaging material and contact the freight carrier immediately.

Prices & Specifications

California Sales are subject to state sales taxes.

All prices are subject to change without notice.

Shortages or Discrepancies

All shortages or discrepancies must be reported within 10 days from receipt of shipment. Please include invoice number and date of receipt.

Warranty

THIS MERCHANDISE IS INTENDED FOR OFF-HIGHWAY USE, MAINLY RACING. THE EFFECTIVENESS WARRANTY AND LONGEVITY OF THIS EQUIPMENT ARE RELATED DIRECTLY TO THE MANNER IN WHICH IT IS INSTALLED, USED AND /OR MAINTAINED. WE CANNOT BE RESPONSIBLE FOR THE QUALITY OF INSTALLATION, AND WE ARE NOT RESPONSIBLE FOR DAMAGE OR INJURY, DIRECT OR CONSEQUENTIAL, LOSS OR CASUALTY WHICH MIGHT RESULT FROM CIRCUMSTANCES BEYOND OUR CONTROL.

Some products carry the manufacturers warranty.

12V Electronic Fuel Lean-Outs

- * More Top End MPH
- * Accepts Enderle Pills
- * Converter Helper
- * Low Draw

As a high-speed lean out, this valve can be activated with an RPM activated switch, timer or momentary switch. Fuel will be taken away at the top end for best horsepower. What's a "Converter helper"? When a fuel injected motor is on a rev-limiter, the motor cools down severely since a large quantity of fuel is not being burned. This valve can be wired to the transbrake circuit so that when the transbrake is set, the valve opens and keeps the motor hot, lean and mean while on the rev-limiter.

FI-5101 Lean Out FI-5103 Enrichment **\$239**

Hi-Speed Assembly

Bleeds off fuel at higher rpm. Frees up top-end horsepower. Install anywhere between pump and distribution block. Variety of Pressures Available. Accepts Enderle Bypass Pill.

Billet Case Show Quality Blowers!

6.71 to 14.71

The Blower Shop superchargers are some of the finest on the market. Their **BILLET case** is superior to cast casings and has a show polished finish.

Proven successful in professional motorsports including: Drags, Marine and Tractor Pulling, Mega Trucks, Salt Flats

More Sizes, Prices & Info!

Competition race blowers are Hard Anodize, has 18 Strips of Teflon and Drilled for Rear Nozzles.

Blower Gel

Penetrating gel with Teflon is designed to lubricate and coat the rotors of Standard Roots superchargers. This formulated gel adheres to the rotors creating tighter tolerances thus, resulting in higher efficiency and increased boost levels.

Premium Burst Panels

Standard size panels are **SFI** Approved. Very popular on Top Fuel & Blown Alcohol Engines.

2pc Aluminum Frame Kit

Designed to mount a burst panel onto a blower manifold. Includes 24 Stainless-Steel bolts.

PSI Blower Tandem Kit

Similar as above but also includes special aluminum center with side brass fitting for quick check of inner panel. Has 2 burst panels.

Burst Deflector

Billet aluminum deflector diverts potential explosions either up or down away from fuel lines and other fragile components. Has depth gauge provision for measuring panel expansion.

Burst Panel Adapters

Aluminum adapters can be either welded or bolted on a blower intake. Ideal for applications where there is not enough surface for the standard 2 pc frame kit. Accepts the standard size burst panel.

Crank Hub & Gear Remover

T-1112 \$157

This tool allows one to safely remove the blower crank hub or harmonic balancer. Unlike some lightweight models, the remover is heat-treated and built tough. It also has a provision for removing the crank gear. Proven many times over by Top Fuel teams.

Crank Hubs

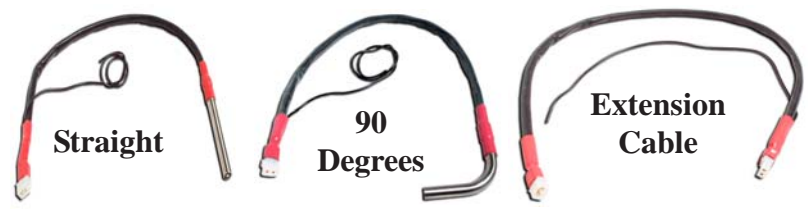

Supercharging ²³

800/576-7661

Crank Triggers

100% coverage foil-shield, twisted pair cable for max noise rejection. Covered with fire-sleeve. The coil is precision wound on a nylon bobbin for long life. Employs a separate 16" ground wire for shielding and max radio frequency and electromagnetic noise rejection. **Can be trimmed to fit** and grounded to the chassis or motor. Highest quality **gold-plated terminals** in the plug ensures that the connection stays corrosion free. Pickup sensors have a smooth diameter and fit perfectly in most 3/8" pickup holders.

Adapter allows one to adapt 3/4"-16 style pickup brackets to the smooth 3/8" pickups (usually used with straight pickups).

Why Use King Bearings?

- * Improved consistency of bearing-to-journal clearance, so you never have to worry about King bearings having the right fit within a set.
- * Superior eccentricity and crush relief values for a better oil "wedge" and less journal wear.
- * Decreased taper across the bearing face, yielding superior wall stability, a more parallel wall and better oil film development.
- * No need to grind cranks "fat" or "thin" to compensate for bearing wall variations.

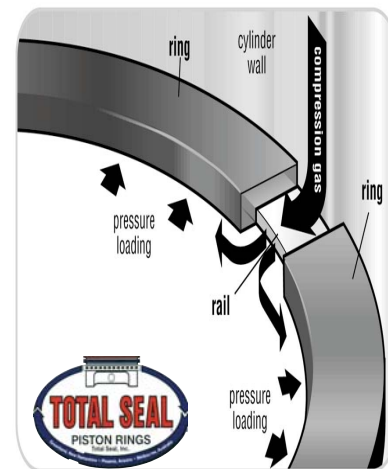

Total Seal Gapless Piston Rings

Keeps Leakdown to **2% or Less!**

As a normal ring wears, the gap opens up allowing combustion gasses to escape. The Total Seal Gapless ring has no gap. Instead, its patented design incorporates a 2-part interlocking ring to close the gap and provide a more perfect seal between the piston and cylinder.

WHY Total Seal Piston Rings?

*Improved Consistency
Cleaner Engine Oil
Better Oil Control
Less Friction
Wilder Torque Curve
More Engine Vacuum
Less Blowby
Longer Engine Life*

*Increased Horsepower and Torque
Lower Engine Oil Temperatures
Saves Money (Fewer Teardowns)*

Not sure if Total Seal gapless rings are right for you? Compare the facts and then decide.

A Pitmat is an exclusive material that can be used on a variety of surfaces including gravel, dirt, grass, concrete and asphalt. Its primary purpose is to provide a clean, durable and comfortable surface to park and maintain your vehicle while at the track or at the shop, but can be used for many other applications.

- *Resistant to Oils

Race Helmets

Helmets are built to meet and exceed **Snell 2015 SA** rating has a fire-resistant liner.

Full Face

Sizes: XS-XXL

SA2015 **\$ 344**

SA2010 Full Face

Helmets \$190 - \$230

Limited Sizes Left

Note: Blown Alcohol & Nitro applications usually requires a Snell "SA" rating.

How to Measure Helmet Size

Video

Hat Size Circumference

XS	6 1/2"	21 5/8"
S	7"	22"
S	7 1/8"	22 3/8"
M	7 1/4"	22 3/4"
M	7 3/8"	23 1/8"
L	7 1/2"	23 1/2"
XL	7 5/8" ...	24"
XXL	8"	25"

To properly determine head circumference, run a soft tape measure around your head (approximately one inch above your eyebrows and just over the ears).

Head & Neck Restraint

NecksGen Head and Neck Restraint System features an innovative tether design that distributes impact loads through 4 different load paths. With an adjustable rear brace designed to fit seat angles from 10-40 degrees.

Adjustment range also allows for a custom fit to the driver. Free floating pads allow for maximum comfort, while the US-made Dupont carbon-composite material offers strength and weight savings.

Equipment Bags

Made from a high quality rip-stop nylon. Internal padding. 3 pockets.

\$169

Cam Degree Installation

Makes degreering a cam a lot quicker and easier. This fixture attached to the block over cylinder #1 using two of the block studs (or bolts). An adjustable stop is included for helping determining top-dead center. Simply install a dial indicator into either the intake or exhaust hole of the fixture.

T-1117 HEMI T-1115 SBC
T-1119 392 T-1116 BBC

Valve Lash Adjuster

Quickly and accurately adjust your valves with this custom tool. Machined from stainless-steel for durability with choice of 7/16, 1/2 or 9/16 hex.

Fits SBC, BB, Mopar & Fords.
1/8 7/32 3/16 hardened Tip.

\$59.99

Stainless Steel

T-1125 7/16 Hex. T-1126 1/2 Hex. T-1128 9/16 Hex.

Main Cap Puller

The bottom-end guy sure appreciates this main cap slide puller. The 5/16 heat-treated threads are easily threaded into the main cap using the slip-proof knurled knob. A simple tug of the tool allows the cap & lower bearing to drop safely into your hand. A great asset for between round thrashes. Also great to have one at the shop.

T-1103 2.5 lbs \$68.99

T-1100 4.5 lbs \$99.99

Wrist Pin Checker

A piston pin failure is catastrophic. Period. And checking their roundness was always a challenge. Now there is a cool tool that allows you to check the pin's roundness to less than .001 thousands in less 5 seconds. And that all adds up to NO kaboom.

T-1132 \$136

Push Rod Straightness Checker

\$139.99

Valve train failure is normally catastrophic and a bent push rod can be attributed as a culprit in many instances. A pushrod out-of-round as little as .010 will begin to flex. I'm sure you have seen the wear marks on the sides of your pushrods and wonder how they got there. With the Pushrod Checker, simply insert the pushrod into the spring-loaded end, rotate 360 degrees and quickly check the roundness of a pushrod to less than .001.

T-1120 BBC
T-1121 Fathead
T-1122 Hemi Fuel

Rod Bolt Stretch Checker

One simply inserts the rod bolt into the Bolt Stretch Checker and records the reading on the gauge. Bolts that are stretched more than .007 are usually discarded. A complete set of 16 bolts can be checked in less than 60 seconds. Might just be the best minute you invested in your engine assembly.

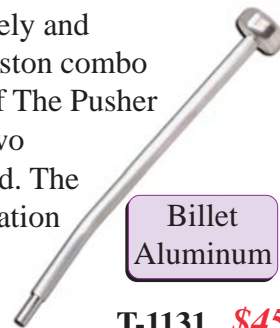

.0005 Accuracy!

T-1158 \$89

Rod-Piston Pusher

Here is a tool that allows one to safely and quickly install or remove the rod-piston combo out of the block. The pointed end of The Pusher is simply inserted into one of the two threaded holes in the connecting rod. The bend in the shaft allows easy navigation around the crankshaft journal. The diver with hot oil dripping onto his face will thank you profusely.

Billet Aluminum

T-1131 \$45

Hemi Top Dead Center Checker

Wanna' check your top dead center like a pro? Then grab one of these. Simply thread the checker into Cylinder #1 of your Hemi and rotate the crank until the dial indicator maxes out. A real time saver when trying to dial in a magneto or camshaft at the track.

T-1134

\$159.99

Billet Primer Bottle Top \$29.99

Machined from BILLET Alum and precisely drilled to allow correct flow of fluid during priming of a blown alcohol or nitro engine. Fits most plastic bottles. A Must Have!

T-1005

Sizes

4.187 - 4.500

\$216.99

New!

Puck Only **\$113**

Sleeve Puller

Sleeve puller is designed to quickly remove steel cylinder sleeves out of the engine block. Large loop handle grip protects one's hand from getting pinched by the slip-proof slide hammer. Puck can be replaced. Very popular with top fuel and alcohol teams.

Sleeve Installer

Sleeve installer is a quick and efficient way to install steel cylinder sleeves into the engine block. One size fits most sleeves. Very durable and rugged. Popular with top fuel and alcohol teams.

T-1098

\$68.99

Chevy Oil Pump Primer

T-2030 **\$20.99**

Engine Oil Pump Primer with sleeve. Inserts into distributor hole to prime the engine with oil prior to initial startup. Fits most V8 GM engines

Valve Spring Compressor

Valve Spring Compressor is one of the strongest on the market and is machined from 6061 BILLET Aluminum. This Spring Tool is designed to handle All-Out Racing Springs with more than 400lbs of seat pressure. This Spring Compressor kit comes with 3 different spring cups that accommodate a range from 1.250in up to 1.675in diameter.

Spark Plug T-Wrench

\$59

T-1004

Spark plug T-handle wrench is machined from steel for strength and durability. Has a 13/16 socket with an internal rubber boot for holding spark plugs in place during assembly & removal. Very popular among sportsmen teams.

Torque Spark Plug T-Wrench

T-1003

\$149

Save time and head damage. This torque wrench only allows the spark plug to tighten to a pre-determined safe setting. Fits 13/16 plugs. Machined from steel for strength and Powder Coated. Very popular among Top Fuel & Alky.

“The Plug Gapper”

Quickly, precisely and accurately gap spark plugs. Billet Alum.

T-1002 \$59

Spark Plug Storage Rack

Heavy-Duty, yet lightweight rack is designed to store 8 spark plugs safely and in order. Large flat anodized bottom keep the rack upright and easily cleans up. Can be used stand-alone or bolted to a work bench. Those that assemble the engine top end will truly appreciate this rack regardless if they're at the shop or in the pits.

T-1136 Holds 8 \$40

T-1138 Holds 16 \$46

Valve Cover Speed Wrench

New!

T-Handle Valve Cover Speed Wrench is machined from lightweight steel (or polished Stainless-Steel) with a steel 7/16 socket. Conveniently helps to tighten or loosen valve cover nuts. Ideal for the racer looking to save time between rounds.

T-1008 Reg Steel \$49 **T-1006 Pol Stainless Steel \$59**

Lower Crank Gear Installer

T-1113 \$48

This tool allows one to safely install the crank gear onto the crankshaft. Has a knurl grip to prevent slippage and is heat-treated for durability. Will fit BBC, Hemi and other similar cranks.

Dampner Installation Kit

\$69

T-1110

Dampner kit for installation and removal of harmonic balancers and crank hubs. High quality kit fits most domestic applications. Comes complete in a hard shell case.

Crank Hub & Gear Remover

T-1112 \$157

This tool allows one to safely remove the blower crank hub or harmonic balancer. Unlike some lightweight models, the remover is heat-treated and built tough. It also has a provision for removing the crank gear. Proven many times over by Top Fuel teams.

Mag Timing Adjustment Wrench

MSD Magnetos

T-1015 \$155

Owners of MSD magnetos really appreciate this unique tool. The billet aluminum band remains clamped to the mag. The removable handle wrench allows for accurate adjustments of the mag while the engine is running. Very popular with Top Alcohol teams.

Magneto Drive Remover

T-1017 \$24

Designed to very quickly and safely remove the drive from a Mallory or MSD Magneto/ Distributor. It simply slips over and holds the 4-Pin or Hex Cross Drive so that one can remove the inner nut. No need to remove the magneto cap and hold the rotor. Ditto for installing the drive.

Injector Hat Tool Tray

Injector Hat Tool Tray is made from high grade aluminum and black powder coated for an attractive long-lasting finish. The tray has plenty of space for tools & also accommodates 16 spark plugs. Fits on top of Bug, Bird & Buzzard.

T-3020 \$129

Rack 'em Up !

Piston & Rod

Safely hold and protect 8 Pistons & Rods during assembly. A must for the serious racer. **T-3003**

\$157

Head Repair

Here's a great rack to store your Valves, Lash Caps, Shims & Retainers during head repairs. Billet anodized aluminum bottom tray. **T-3009**

\$144

Valve Train Trays

These trays are made of a very light-weight yet rigid plastic material with built-in handles. The valve tray holds valve springs, valve locks, and the largest of valves. The rocker tray holds push rods, lifters, poly locks, spark plugs and rocker arms. Perfect for the home mechanic or pro racer.

JAZ-735-001-06 Valve & Spring
JAZ-735-002-06 Rocker Arm & Lifter

Hose Fitting Assembly

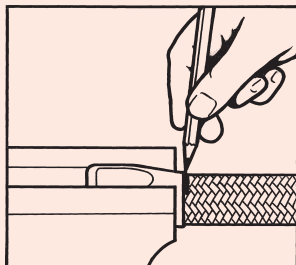

Online Assembly

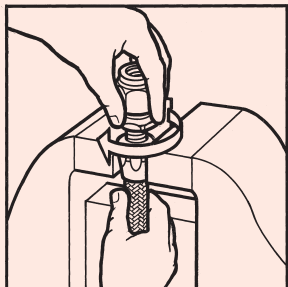

1. Wrap hose tightly with tape at cutting point. Using a fine tooth hacksaw, cable cutters or radiac wheel, cut the hose in the middle of the tape. Remove tape after cutting being careful not to fray the braid.

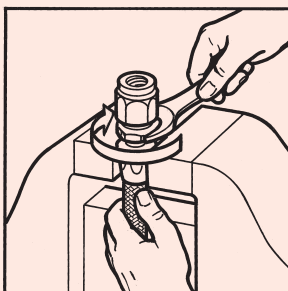

2. Slip hose into socket to the depth indicated by the hose insertion mark on the outside of the socket. This should be just short of the back of the threads. **VERY IMPORTANT** - Mark hose with tape or suitable marking device at rear of socket. This mark will later indicate to you if the hose has pushed out of the socket during assembly.

3. Using an anti-seize lubricant, liberally lubricate inside of hose and threads on the nipple. Holding nipple horizontally in a vise equipped with soft aluminum jaws, push socket end carefully with hose nipple with a turning motion and engage nipple threads into those of the socket. Continue tightening by hand as far as possible to make sure that the threads are properly mated and no cross threading has occurred.

4. Using an aluminum fitting wrench, finish tightening assembly. When properly assembled a small gap of .030" or less should exist between the socket and shoulder of nipple. **NOTE:** Check marks on hose in step 2 for any evidence of push out. Hose assembly must be cleaned and tested to twice the operating pressure.

No more Bloody Fingers!

Assemble Braided Stainless Steel hose without poking your fingers. Ideal for racers and performance enthusiasts who have experienced the painful challenge of installing the AN socket.

How-To Demo

Benefits of Using Copper

Conductivity. Copper is the standard by which all other conductors are measured, therefore a copper gasket provides superior thermal conductivity, acting to stabilize head and block temperatures which makes tuning easier.

25% Coefficient of Elasticity. One of the properties of copper is that it stretches before a catastrophic failure, providing an extra measure of safety in case of severe detonation.

Strength. Copper (in the form SCE uses) has a tensile strength of approximately 32,000 psi, compare this to the 1200 to 1800 psi tensile of most facing materials used on conventional performance head gaskets.

Copper Head Gaskets

**Premium Quality * Properly Annealed
Perfect Fit * Dead Soft Copper**

**Track Tested & Proven by Top Fuel
& Alcohol Racers**

www.DragParts.com

Motor oils, transmission fluids and gear oils are flowing lubricants that provide a film barrier between metal surfaces pressing or rubbing together. The greater the film strength, the better the oil. However, in extreme pressure metal-to-metal areas, the film strength of oil is seriously thinned and is often completely squeezed out. On the other hand, **Prolong** is a bonding lubricant. **Prolong AFMT™** interacts with metal surfaces in a molecular and chemical process to create a protective buffer on the surface of the metal. This is not a film or coating over the metal. Molecules in the AFMT™ formula are polarized and actually bond with the metal surface. The layer of AFMT™ molecules is activated by extreme pressure and heat, meaning that **Prolong** lubrication performs best right where it is needed most! The result, AFMT™ significantly reduces harmful friction and heat.

Fortified with Prolong's advanced technology, nothing works better than Prolong Oil Stabilizer to help **solve lubrication-related** problems. Other oil stabilizers on the market do not include the necessary additives provided by today's motor oils, such as antioxidants. The formulation of Prolong Oil Stabilizer includes: Prolong's AFMT™ (Anti-Friction Metal Treatment) advanced technology as well as vital additives to provide a completely formulated oil stabilizer product, which sets this product apart from the other competitors. (32oz)

Works great in high horsepower, drag racing engines especially those injected or blown.

Fuel: Gas, methanol, diesel or nitro fuels.

Oil Stabilizer

PSL13032.. **\$9.99**

Prolong Waterless Wash & Shine is a revolutionary new method of washing and shining your car in less than 15 minutes without water. No buckets, no hoses, no rinsing and drying! Simply spray on the surface and wipe dry. With Waterless Wash & Shine you can conveniently and quickly wash your race or show car anywhere, anytime. Leaves a protective film that provides gloss, color and smoothness that conventional car washes fail to deliver. (17oz)

Wash & Shine

Safe & effective on race and show cars. PSL64017.. **\$6.99**

50W Oil for Alky & Nitro

Nitro 50W Racing Oil, Specifically developed for racing engines fueled by Alcohol and Nitromethane. Exceeds the demands of high displacement, high RPM racing engines. (1 Gallon)

PSL14501.. **\$32.90**

Super Penetrating Lubricant Spray is formulated with AFMT™ (Anti-Friction Metal Treatment) advanced technology to **lubricate, penetrate, and prevent** corrosion, free sticky mechanisms, **displace** moisture, stop squeaks, and reduce friction and wear on all metal surfaces. **Easy-to-apply** protection and lubrication for hundreds of performance & recreational uses as well as industrial applications such as light duty machining, tapping and drilling fluid. (16oz)

Lubricant

Ideal for:

Enderle & Hilborn fuel pumps, barrel valves & shutoffs.

Hot Rod & Classic Engine Oil

- LOP-10683 10W-40 Oil 5Qt \$ 35.99

Because many of these very special machines often spend long periods off the roads, special additives are formulated into the oil. Similar to Lucas' Marine oils that provide rust and corrosion protection

Lower cylinder head temps. **Super Coolant**
Allow advanced timing and more horsepower.
Reduce operating temperatures by up to 20°.
Prevents corrosion and deposits that cause leaks, overheating, and cooling system failures.

- LOP-10640 Super Coolant 16oz .. \$ 12.99

Transmission Sure Shift

*Smooth, precise shifting * Extraordinary protection*

This is no normal ATF formulation. It has been developed to give the smooth, precise shifts needed by racers and yet extends a degree of protection not found in any other ATF. This product will stop wear and tear like nothing you've ever tried. **LOP-10052 Sure Shift 1 Qt... \$ 7.99**

SAFEGUARD™ ETHANOL Fuel Conditioner With Stabilizers

Lucas Safeguard™ was developed to specifically address issues associated with using ethanol based fuels. This applies to E-10, E-15, E-85, pure ethanol and any mixtures in between including gasoline. Safeguard™ is completely soluble in all ethanol fuels and will not harm filters. Contains effective additives to prevent rust and corrosion associated with the use of ethanol fuels.

Treats 80 Gallons

- LOP-10670 Ethanol/ Alky Conditioner 5.2oz \$ 6.99

Synthetic Gear Oil

SAE 75W-90 Synthetic Gear Oil is a non-foaming, super slick, long lasting lubricant designed especially for high performance applications where other gear lubricants just aren't good enough. Contains a special additive that cushions gears and resists "squeezing out" under extreme pressure situation. Specially designed to stand up to high temperatures without losing its lubricity.

- LOP-10043 80W-90 1 Qt Non-Syn \$ 8.99

- LOP-10047 75W-90 1 Qt Synthetic \$ 14.99

Extreme Pressure Valve Train Synthetic Grease

Greatly reduces friction on moving parts to prevent galling. Excellent adhesion quality. Excellent on all surfaces requiring an extreme pressure lubricant. Perfect for assembly lube on rod bolts. Protects pushrod ends on initial start up. Essential for roller lifters, rockers, pushrods and camshafts.

- LOP-10563 1 oz Tube \$ 9.99

Semi-Synthetic Assembly Lube

Lucas High Performance Assembly Lube is designed for mechanics and technicians to pre lube bearings, cams, lifters and valve train. The Semi-Synthetic formula that contains ZINC, MOLY and other high pressure additives which offer maximum protection during engine break-in. Super slick and easy to use, Lucas High Performance Assembly Lube will eliminate dry starts and prevent seizing galling and scuffing.

- LOP-10153 Assembly Lube 8oz \$ 7.99
